

## *Testimonials...*

"Since 1908, American Pulverizer has been making quality reduction equipment for use around the world in a variety of reduction applications such as: coal, chemicals, ferrous and non-ferrous scrap, hazardous waste, limestone, ore, construction and demolition debris, plastic, tires and wood.

Our manufacturing process is efficient and is constantly managed for continuous improvement; our workforce is highly effective so its management requires an equivalent method. Our workforce management needs are challenging.

American Pulverizer purchased Kebrit's Workforce Management Suite because it delivers the functionality that we need; it is robust and customizable. Kebrit's Support delivers on the promises of high responsiveness and reliable upgrades; its service team is professional and very knowledgeable.

Today, American Pulverizer continues to provide its clients with on time product delivery thanks in great part to Kebrit's Workforce Management Software."

"Forbes Custom Products specializes in the production of high quality, cost effective custom information packaging. We manufacture custom binders and other vinyl products in our American facility and import some information packaging from our network of outsourcing partners. Forbes provides quality workmanship, timely delivery, and first rate customer service.

Our commitment to our customers places on us a responsibility to optimize our systems and processes. In order to be able to make reliable, cost effective production a reality we need a manufacturing process that is free of unnecessary redundancies and wastage. Kebrit's Workforce Management Suite provides us with automated data collection that frees up valuable shop floor resources, and helps us save considerably on labor costs and HR/Payroll staffing. The savings that we generate as a result of using Kebrit's software help us offer our clients great value and price."

"CenterLine (Windsor) Limited is a recognized industry leader in the design, manufacture and supply of products and services that satisfy resistance welding, GMAW welding, laser welding, metal-forming and cold spray applications for the automotive, mass transit, aerospace and defense industries.

CenterLine is a vertically integrated, international, company with the capabilities to satisfy virtually any joining or forming production automation need.

The nature of our business demands that our manufacturing process be lean, efficient and above all cost effective. Like most manufacturers, labor costs are amongst our highest overhead expenses. In order to ensure that our labor costs keep us competitive we purchased Kebrit's Workforce Management solution. Today, Kebrit's software keeps our labor costs down and gives us the ability to manage our workforce through every facet of our operations."
